

Hello and welcome,

It is not an accident that you are listening to this broadcast. I truly believe it is a divine appointment. I know that the information that I will share today will confirm some things that you have suspected, but it may shock others. However, what am telling you is the truth and it actually happened to a close person of my family and some of it was personally witnessed by myself. You may want to get a notepad and take notes. Also, you can make of this story what you want, but it did happen.

Before I begin, I pray that the Holy Spirit will anoint every word of this teaching and bring truth and wisdom to every listener. In Jesus name. Amen.

About six weeks ago a close person of my family got sick with a very high fever and shortness of breath. They were taken by ambulance to the emergency room at the level one trauma center hospital in their area. They were tested for Covid and it came back positive. The family member that accompanied them to the ER was told they would have to leave. The person was being admitted and put on the Covid ward. The patient received IV steroids and Remdesivir and some vitamin supplements. The ER doctor said that the patient had waited too long to come to the hospital and was not eligible for the plasma infusion of antibodies. Which they said was protocol?? That word protocol is very central to this story. The patient was put on oxygen, but their oxygen levels in their blood was dropping.

I don't know if you have been on a Covid ward, but each patient is in a private room and this hospital had installed speakers in large windows that looked into the patient's room. The medical staff did not go into the room unless necessary and they just stand at this window and speak instructions to the patient. The patient can also see the medical personnel.

This patient would have prolonged and violent coughing spells that drastically reduced their oxygen levels and they could see their levels dropping on the monitoring equipment and would beg for the nurse standing at the window to come in and assist them with their oxygen supply and mask. The nurse would not come in and assist, but would tell them through the speaker that they had to consent to be ventilated. The patient stated the obvious that they could still talk even though their oxygen levels were dropping into the eighties and even the seventies and that they did not want to be ventilated. After a couple of days of this bullying to be ventilated against their will, they called family to intervene. A family member was allowed in the room and discussed with the doctors and the nurse on duty the issues and a treatment plan going forward. One doctor was the general doctor, which was not really a doctor but a nurse practitioner and an infectious disease doctor consulted with the family. The family asked what medicines that they were using to treat Covid and they were informed that this hospital had a committee that decides what treatments they are allowed to use to

treat Covid. The doctor stated that they used steroids and Remdesivir. That was the approved protocol by the committee which followed the FDA and CDC guidelines. When asked by the family why other treatments were not being considered and offered to the patient, they replied that if they used other treatments they could lose their license and government funding could be withheld from the hospital. In other words, your loved ones with Covid at most hospitals are being deprived many treatments that show success in treating Covid and improving patient's survival. The doctors stated that if a patient did not respond to the steroids and Remdesivir in a few days and if their oxygen levels dropped into the eighties that they would be placed on a ventilator and they would get better or die. They said most that went on the ventilator died within about ten days. So the family clarified that there are many other treatment options or as I like to say there were many more tools in the toolbox that could be used but because of government mandated protocols people were being denied these medicines and treatments even though they were dying.

Like I said before I am just telling the actual experience of this patient and you make of it what you will.

But does it sound like our own government is denying people who will probably die on a ventilator every medical treatment and medicine that could possibly save their life and threaten any doctor or hospital with revoking their medical license or withholding government funds that challenge or oppose their government mandated protocols. Does this sound like our government cares about the people of this country during a national pandemic? Does it sound like patients and families and their personal doctors are no longer making their own life and death decisions? Does it sound like we no longer have any control over what kind of medical treatment we can receive or refuse? Does it sound like a committee or government death squad is making our health care choices for us? Does it sound like a planned or intentional de-population of our country or the world?

If this information upsets you, just wait, it gets worse.

So the family leaves the patient's room after spending hours visiting and talking with the medical staff and assume that everyone has an understanding that the patient does not want to be ventilated and they were going to make some minor changes to the patient's medicines, like codeine cough syrup more often. The next day before noon the patient calls the family again frantic. They say the nursing staff are refusing to come into the room and assist with their oxygen again unless they consent to be ventilated. The patient's oxygen is at times in the sixties. Now some of you may be medical professionals and I used to manage a doctor's practice, so we know that most people pass out before this point and that we are told that brain cells begin to die at 88 to 85% oxygen levels. So many of you are saying yes the patient needs to be ventilated, but this patient is talking and walking to the bathroom, but of course concerned that they need to get oxygen levels up but not getting any assistance from the nursing staff.

The patient is so disturbed that they want to leave the hospital and they want the family to pick them up. So the family gets the nurse practitioner on the phone with the patient and try to calm things down. However, the medical person is very abrupt and asks the patient if they want to leave against medical advice, Yes or No. That's all they want to know. Well the patient says that they do not want to be ventilated and they just need assistance with their oxygen and that they should probably stay in the hospital. But the medical person says they just need a yes or no answer, do they want to leave against medical advice. The medical person offers no other options. It is the hospital way or the highway. Be ventilated according to their protocols or leave against medical advice. So the patient says well they were not being given a rational choice, but that they felt like the staff was trying to kill them and that they would leave the hospital. The family was about 15 minutes away and they said that they would be there soon. By the time the family got there the staff had called security and did not use a wheel chair for a person who could hardly breathe and escorted them out of the hospital and left them on the sidewalk all alone without even a chair to sit on.

The patient showed the family bruises on their body. One was at least ten inches wide and the patient said that they really thought they were going to kill them. They were bullied, neglected, and refused help and really felt in danger.

The next day the patient had to call another ambulance and was taken to another area hospital. When they arrived at the ER they were tested for Covid again. Now this is just about four days after being told they were positive for Covid at the previous hospital and only one day after leaving a Covid ward, but the new hospital said that they were negative for Covid. They gave them a very strong antibiotic for a bacterial infection and breathing treatments for pneumonia and the patient received very good care. It still took over five weeks in the hospital to finally get discharged. The patient really needed rehab to get their strength back but because they refused the Covid shot they were not admitted to a rehab center. Even though supposedly they have had Covid and their natural immunity is 13 times stronger than someone who has had the Covid shot and there is a lot of evidence that shows that if you have had Covid that it is detrimental to get the Covid shot because you have natural antibodies. So they went back home to struggle to get back to normal on their own. Now this person has private insurance. They are not a charity case and they are not on Medicare and they are a middle age productive person in society. So I am relaying this true story so that you know what is really happening to your loved ones on Covid wards in some hospitals.

Some of you may still want to blindly trust your doctor or your hospital, but you better beware, because if your doctor belongs to a group practice or they have been bought out by a large hospital corporation, then they are very likely to

follow the government mandated Covid protocols. They aren't going to come out and say that to your face, but they can lose their position or be fined heavily by their group of doctors or lose their license to practice medicine or be investigated by Medicare or Medicaid for fraud for not following preferred practices. The punishment that the government can bring to bear on the doctor and hospitals is very harsh. Your medical treatment is not being decided by the doctor and their patient or family. You may even suffer abuse, neglect, or die if you choose to blindly trust the medical profession today.

So what do you think about Covid now? Do you think that it was an accident that this virus from hell was unleashed on the world? Do you think that a so-called Covid vaccine is being mandated for everyone to take is for our own good? Do you think that pregnant women, small children, or people with natural immunity should be forced to choose to take the Covid shot and to keep their job or go to school or get an unproven substance made from aborted baby material injected into their body when their natural immunity is several times stronger than any vaccine??

Wake up people around the world, standup and speak up. Covid shots are probably not about our wellbeing. It seems to be about an agenda. There is something that is in that shot that will most likely help the enemy to control you or harm you sooner or later.

Also, during a pandemic and we already have a nursing shortage, why are we firing nurses who do not want the shot. Why is our government willing to import nurses from the Philippines and put our own citizens into joblessness and poverty.

Just a few months ago these brave nurses who put their lives on the line to work with Covid patients were called heroes but now they are going to be called unemployed. The government is working on something called "Shielding Laws". Parents you better get involved now, because they are going to take your children away citing that you are endangering them by not getting the Covid shot or giving it to your child. It looks like our government is determined to harshly punish the citizens of the United States into submission to get this Covid shot. No government of the people and by the people should stand for this. These are the tactics of Hitler and Stalin and Chairman Mao.

Pastors why are you quiet and submitting to this tyrannical government over reach? If you are afraid that the government will take away your tax exemption or your tax deductions for donations, they will eventually anyway. I hope every pastor or church leader in every country will encourage their congregation to call their senator, congressman, governor, mayor, state legislators, and the judges and protest and resist ALL government over reach and mandates.

Shame on pastors that say this Covid shot is a gift from God even though it contains aborted baby material. Shame on you that say this shot is God's way of taking a terrible injustice and turning it for our good. Shame on pastors that will not give their church members a letter stating that they do not want the shot for religious objections. God is watching and God will not forget the pastors that are leading their sheep astray. You are like the false prophets of the Old Testament that called evil things good and good things evil. The Bible says it will be better to have a millstone tied around your neck and for you to be thrown and drown in the sea rather than hurt one of God's little ones. God has a very special punishment for the shepherds who cause their flock to stumble. Pastors do not be deceived this anti-christ government will come for you too eventually. You cannot negotiate with evil and you cannot disciple a demon. Please stand up while we still have time to make a difference. You are just rearranging the deck chairs on the Titanic while the whole ship is sinking under you. Get political, get vocal, get active, get busy, before all is lost.

Also if everyone has to have the Covid shot and it is so important that our own government is harshly punishing its own citizens for not taking it then why are our borders wide open and we are receiving thousands of illegal aliens into our country that do not have the Covid shot and may even be contagious.

I am telling you that Covid is just an excuse to grab power, control the people and deprive us of our rights not just in the United States but all over the world.

If you want to preserve your freedoms, you better stand up now!!

Thank you and God bless.
