

Hello and Welcome

Let's start with a prayer.

Jesus anoint every word and scripture in this broadcast. Let every listener open their hearts and receive your Word. I pray for our nation and our leaders to have God's wisdom and guidance. In Jesus name. Amen.

I have been teaching on how to receive healing, victory over challenging circumstances, and breakthrough strategies to overcome satanic attacks in your life.

I like to share God's Word and demonstrate how every individual can take God's Word and apply the Bible in a practical and useful way to their own daily lives.

However, today, I want to address the "sick" condition of our nation and our political leaders. I have some comments and scriptures for our leaders in Washington and for all those who are in authority over us.

I want to make it clear that am an independent voter and I vote for the "person" based on their views on the issues and not political association or party.

Having said that, I urge ALL Americans, but especially Christian Americans to register to vote, to become familiar with the issues from many sources, pray for God's guidance, and then be sure and vote for the candidate that reflects their own values, convictions, and direction for the country.

Our nation and its leadership has been in decline for decades. It is like a person whose health has been declining for years, but now that person is a very sick patient. That patient is in the emergency room at the hospital in desperate need of life support and the doctors and nurses are arguing in the hallway instead of getting this patient life saving medicine. The doctors are fighting in the hallway

because some are wearing red uniforms instead of blue uniforms. The nurses are fighting over which side to place the IV, left or right. All the time the patient is suffering and growing weaker by the minute. But instead of doing their job, the medical staff is attacking each other in the hallway.

When did political party association become more important than going to Washington and doing the job that the people sent you to do? The people really don't care if you wear a red hat or a blue hat, but we do care about you taking care of the business of the nation.

Americans are very independent thinkers, at least we "used" to be. We want what is right for the nation. We want problems addressed and solved and not just kicked down the road for someone else to deal with because the person we voted into office does not have the political will to just reach across party lines and get a workable solution. No not everyone is going to agree. You are not going to please everyone, but you cannot just fight and argue and ignore the very "sick" condition of our country any longer.

So if the politician that is supposed to be working for you is not doing their job and solving problems and getting results, then send them a wake-up call. I believe that it is time for all Americans and especially Christian Americans to shake yourself and let our leaders know that it will not be politics as usual. We are tired of them playing politics while our nation and the people suffer.

I am calling for Christian Americans to enter a time of prayer and fasting for our nation and for our political and government leaders. I am asking you to commit some time every week or day if you can and fast a meal and use the time that you would to eat a meal and pray for our country. I want you to perform this every week during our upcoming primaries and national elections next year. I am asking you to pray for the current and future leaders that are in authority over our nation. Please start this week and invite others to join you. Contact your church, your friends on Facebook, co-workers, neighbors, and family. Start a prayer chain just like you would for a sick person who is very ill and needs healing.

God's Word instructs us to pray for those who are in authority over us.

In Psalms the Word says that if the righteous foundations are removed, what can a believer do?

This is a very serious matter. The Bible clearly states that a house divided against itself cannot stand.

America is under attack. Yes we have foreign countries and terrorist groups that are our enemies. We also have some of our own citizens that would like to see America fail. These are foreign and domestic flesh and blood enemies. However, we also have a spiritual enemy. This enemy is not flesh and blood, but an unseen power of darkness and wickedness in high spiritual places that is waging war against our nation. The spiritual war can't be fought with tanks, bullets, and missiles. Also, you cannot defeat a satanic attack with highly educated arguments and speeches. A spiritual attack is fought and won on our knees, praying, repenting, fasting and having a true change of heart.

God's Word tell us "as a nation" to humble ourselves, repent of our sins, turn from our wicked ways and cry out in prayer to God to heal our nation.

We are not going to have a healthy nation if we don't stop the hate, the anger, the rage, the malicious acts, dirty political fighting, and caring more about obtaining personal power and wealth over addressing serious needs of the people and the country.

The neglect of this nation by our political leaders is shameful. We have real issues that need leaders to act like civil, educated, concerned grown-ups and for them to sit down and solve our problems.

We voted them into office to be public servants and to address and fix the major issues that face our country, not to see how much chaos they can cause to the other political party or to gain personal power and wealth for themselves.

Their job is to serve and protect the citizens and well-being of this nation. If they fail to do their job, we the people must vote them out of office. Frankly, if we are honest, most of the current leaders are not doing their job.

While they fight and squabble like a bunch of spoiled, entitled children we have our enemy China parading weapons down main street Beijing designed to destroy our cities. We have our own homeless crisis and our own citizens need shelter and mental health support. We have many veterans that have given up arms and legs and eyes and ears to protect this country, but they need better medical care. Our own children are dying from drugs and suicide by the thousands. We have Russia and Cuba getting a stronger position in our hemisphere by infiltrating the politics of Venezuela. Also, Russia is expanding its influence around the world by gaining influence over Crimea, Syria, and Iran. We have terror groups supported by Iran disrupting world oil supplies by attacking allies in the Middle East. Also, Iran mocks us and continues to pursue nuclear weapons just like North Korea. As a country girl, I ask the question, who is guarding the hen house from the predators?

Also, we need a workable solution to immigration and implement effective border security. I think of our national borders like the front door to my house. To keep out unwanted guests or harmful intruders or dangerous criminals, I secure my doors and windows with locks. I control who enters my house and has access to my resources. I have worked hard to accumulate whatever substance that I have in my house. I also have limited resources to replace those things in the event that they are destroyed. It is just common sense that if you don't want your resources taken you must protect those resources. It is simple, you lock your house, you lock your car, you lock your safe. You secure it, to protect it. That same common sense applies to our country, you must secure the borders and control who you let enter.

That is not a racist or immoral idea. Just like your family, this nation has limited resources. As an individual, I have a responsibility to take care of my family's needs first and then if I have extra resources left over, then I can share or help others.

Well this nation has limited resources too. Our leaders have an obligation to make sure that the citizens that already live in this country have a safe, prosperous, healthy, and strong place to live.

America already has a 23 trillion dollar debt and our leaders just keep spending our children's future. How is committing more of our resources to anyone helping the citizens of our own nation?

How can anyone accuse you personally or as a nation of not having a caring heart for people, just because you demonstrate common sense about the limits to your resources. Respecting the fact that we as a nation have limits to what we can do for the rest of the world, is not racist nor is it immoral. It is just common sense.

Just face facts, America has some very serious foreign and domestic problems to actually deal with. Why are our political leaders not doing their jobs? I am frankly, disturbed and disgusted by all the Washington drama, drama, drama, and no action, action, action to get visible results for the people of this nation.

In closing, I urge you to pray for our very "sick" nation and its leadership. Remember, nothing is impossible with God.

Thank you and God bless.
